

Quality

Certification

- Independent Inspectors CSS JSC was the first Bulgarian inspection company accredited as Inspection Body according to the requirements of BAS (Bulgarian Accreditation Service) with Accreditation Certificate No 13C "OKA/K". Our new accreditation according to BDS EN ISO/IEC 17020:2005 "Certificate BAS No 204" OKA is valid until April 30, 2010.

This accreditation demonstrates the objective appreciation of the authorized State Organization for our successful efforts to work according to European rules for our clients caring for the protection of their interests. Achieving this means a lot for us.

Most important for us was to organize ourselves and first among the Bulgarian Inspection companies to get subjected to such an independent appreciation which to assure our clients in the quality and responsibility of our work for them.

A lot of clients would not know or would not properly evaluate the difference of inspection services they would order to a company accredited as an Inspection Body or to some other company who might claim to be good but without any proof from authorized organs.

- Independent Inspectors CSS JSC has installed and certified a successfully working Quality Control System in compliance with ISO 9002 "Certificate No. QBE 99014/04.02.1999, the validity of which was extended until December 14, 2015 and in compliance with ISO 9001:2008 - Certificate HU07/2407. "Membership in branch organizations" ASTM Union of the Quality Experts in Bulgaria "our employee is member of the Board CLUB 9000 "Organization of the ISO 9000 certified companies in Bulgaria Bulgarian Chamber of Trade and Industry
